Titles and descriptions of presentations follow ...

BEIJING

Friday evening May 18th: COSMIC WEATHER REPORT

Studying planetary patterns prominent in the year ahead helps us align our earthly life with the celestial energies, so bringing benefit to ourselves and others. Additionally, by December 2018, five planets will have changed signs – Jupiter, Saturn, Chiron, Pholus and Uranus! We explore the imaginal processes of the transitions which are signalled – what processes are indicated within the individual soul and the world?

Saturday workshop May 19th: CHIRON AND THE HEALING JOURNEY

Chiron, a Minor Planet or ‘Centaur’ was discovered in 1977 and represents the elements in a horoscope that call us to the ‘Healing Journey’, for the awakening and benefit of ourselves and others. This workshop will include a brief summary of the astronomy and mythology but our main focus will be Chiron in the individual horoscope, with an opportunity to explore our own chart through a Guided Imagery process.

Sunday workshop May 20th: THE NODAL AXIS – DRAGON’S HEAD AND TAIL

The Nodal points are not physical objects, but represent the intersection of the pathways of the Sun, Moon and Earth; their symbolism refers us to the balancing, indeed the incarnating, of the interplay between the Primary Lights, the Luminaries. Here we find our relationship to the people, places and events which shape our destiny. During this seminar, we explore the the Nodes and discover new ways of considering them in the horoscope.

TAIPEI

**Saturday workshop May 26th:
CHIRON AND THE HEALING JOURNEY**

Chiron, a Minor Planet or 'Centaur' was discovered in 1977 and represents the elements in a horoscope that call us to the 'Healing Journey', for the awakening and benefit of ourselves and others. This workshop will include a brief summary of the astronomy and mythology but our main focus will be Chiron in the individual horoscope, with an opportunity to explore our own chart through a Guided Imagery process.

**Sunday workshop May 27th:
THE FOUR ANGLES OF THE HOROSCOPE**

The structure of the horoscope is defined by the four angles - ASC/DESC and MC/IC. Each has many different levels of meaning, which includes the 'tracing' of our ancestors through using 'derived houses'. We focus on the 'skeleton' of the horoscope, the Angles, also considering the process of the sequence of houses, planets on the angles, and transits across them
